A scatter plot showing the relationship between 'internet_users' (x-axis) and 'life_expectancy' (y-axis). The x-axis ranges from 0 to 100, and the y-axis ranges from 40 to 90. The plot features a grid of light gray lines. Data points are represented by dark blue dots. A blue box highlights the data point for Pakistan, which has an internet_users value of 0.55625. The plot shows a positive correlation between internet usage and life expectancy, with most countries clustered between 0 and 50 on the x-axis and 40 to 70 on the y-axis. A few countries with high life expectancy (above 70) are also present, particularly at low internet usage levels.
